

I wish to have a home recording studio

Léa, 16

Wish granted in June 2020
heart condition

In 2005, only 8 days after her birth, Léa had her first open heart operation. When she was 11, she received a 2nd aortic transplant and in March 2019, she was implanted with a pacemaker.

Now 16 years old, Léa is enjoying life and devoting a lot of time to her passion, singing. “I wish to have a studio in my room to record my songs. “Last june, it all came true as Léa safely received all the essentials for her own studio at home.

She even had a virtual consultation with Simon Walls, music producer, to learn how to enjoy it and produced a song where you can hear her heartbeat. She enjoys her studio every day and even dreams of making a career out of it.
