

Cloey's Story

I wish to have my own puppy

Cloey, 11
autoimmune disorder

11-year-old Cloey enjoys spending her time reading chapter books and creating different pieces of colourful artwork. Her favourite subject in school is science and she likes the colour blue. Cloey was diagnosed with an autoimmune disorder. She lives with chronic daily pain, as well as many other side effects from her illness, which can take a toll on her mental health.

Just like most 11-year-olds, Cloey LOVES puppies! After contemplating what she would wish for, she discovered that wishing for her very own puppy would bring her joy for many years to come. Luckily, we had just the right little doggy for her – a yorkie puppy!

There are days where Cloey just needs to lay around the house, but that can sometimes get lonely. Now, she will never have to be in the house alone – she will have her little furry friend, Bean. Bean will be such a great addition to the family, and Cloey will be able to tell Bean any secrets that she doesn't want her family to know!

When asked about her favourite part of the wish, Cloey's mom, Cassandra told us, "My favourite part would have to be the joy it brought to Cloey's face." She continued, "Cloey has a smile on her face a lot, but most of the time it's a fake smile to mask her pain. Her wish brought her true joy and put a genuine smile on her face – one that we haven't seen in a long time."

Hope is essential for children with critical illnesses, and its life-changing power is unlocked when wishes, like Cloey's, are granted. It is thanks to the generous support from our donor community, that we can continue to transform lives, one wish at a time.
