

Emanuel's Story

I wish to have a pool lift

Emanuel, wish granted 2020
genetic condition

Emanuel gets up every morning in a cheerful mood. He is confident and always ready to have fun. Despite being blind, he likes an atmosphere that is lively, and when his family is talking loudly and laughing.

At the age of 4 months, Emanuel had health issues, and extensive examinations led to the diagnosis of a very rare genetic disorder, Zellweger syndrome. Emanuel and his family have shown resilience and hope, and despite his health struggles, Emanuel loves life!

Emanuel adores being in water because it gives him a great feeling of freedom. His wish was to have a lift for the home's swimming pool. "To think about the joy that Emmanuel will have in participating in the family swims makes us happy. The sadness we had when he was not included is finally a thing of the past! We can't wait for summer," said Jacinthe, Emanuel's mom.
