

Emmanuelle's Story

I wish to have a Savannah F4 cat

Emmanuelle, wish granted 2021
leukemia

Emmanuelle was diagnosed with leukemia. Her medical condition has led her to interact with pet therapy animals to help calm the anxiety. Emmanuelle loves animals (she already has three cats, a dog and a rabbit at home), cooking and anything to do with Italy.

When asked her what her most heartfelt wish would be, Emmanuelle didn't hesitate for a second. She knew she would wish to have a Savannah F4 cat! This breed of cat likes to be walked on a leash, like a dog. This new companion would therefore become her friend and her pet therapy animal.

Surrounded by her family, Emmanuelle received her kitten, temporarily named Victory. The name was appropriate because the day her wish came true was the same day she completed her treatments! Emmanuelle was overjoyed when she saw her new kitten in her carrying cage.
